

**COCKERMOUTH
URBAN DISTRICT COUNCIL**

Annual Report

of the

MEDICAL OFFICER OF HEALTH

ANTONY HARGREAVES, M.B., Ch.B., D.P.H.

FOR THE YEAR 1969

Together with the Summary of Work
of the Public Health Inspector

Urban District Council of
Cockermouth

ANNUAL REPORTS

Medical Officer of Health

and the

Public Health Inspector

for the year

1969

TO THE CHAIRMAN AND MEMBERS OF THE COCKERMOUTH URBAN DISTRICT COUNCIL

Mr. Chairman and Gentlemen,

I have the honour to present my fourth annual report as Medical Officer of Health to the Cockermouth Urban District Council.

My appointment is held jointly with the Keswick Urban District, the Maryport Urban District, Workington Borough, and the Cockermouth Rural District — thus covering the whole central and western part of the county, for whose Council I also act as the Western Area Medical Officer.

On the whole the vital statistics for the year were satisfactory, although I note with dismay that two cases of pulmonary tuberculosis were notified in teenage girls. Protection against tuberculosis by B.C.G. vaccination is routinely available for all school-children, and parents are urged to see that their child is so protected.

I again note that the birth rate, when averaged out over a five-year period, is below the national average (Cockermouth U.D. — 16.3; England & Wales — 17.0), and the death rate is above the national average (Cockermouth U.D. — 12.8; England & Wales — 11.5). As we are not being continuously visited by the plague, this would argue an ageing population, with all that that implies for the community care teams and the welfare services, and the increasing stresses that will be placed upon them.

At the other end of the age scale I would draw attention to the subject of measles. Although measles occurs sporadically all the year round, it tends to achieve epidemic proportions in a cycle which has a two-year interval. Between October 1968 and March 1969, there were 71 cases of measles notified in Cockermouth town, i.e. a minor epidemic. We may expect another epidemic in 1970 - 71 which may not be a minor one. If this happens it will be a tragedy, as there is available — free — an effective and safe vaccine which will protect otherwise vulnerable infants and children from this often distressing, and occasionally dangerous disease.

The County Council have been waiting for some time for a site in Cockermouth to emerge whereon they may build a Home for the aged that is so urgently needed for this part of the world. They have the money and the will. When are we going to produce a suitable site?

The second part of this report has been prepared by Mr. Simpson, and shows the work undertaken and being carried out by his department during the year. I would record my appreciation of the co-operation and help which I receive from him at all times.

I would like to express my thanks for the invaluable assistance given to myself by Mrs. K. Nairn of the Health Department, and for the help given me by the Clerk and his staff, and for the kindness and helpfulness shown to me by the members of the Council.

I am, Mr. Chairman,

Your obedient servant,

ANTONY HARGREAVES,

Medical Officer of Health.

STAFF OF HEALTH DEPARTMENT

Medical Officer of Health :

A. HARGREAVES, M.B., Ch.B., D.P.H.

Public Health Inspector and Surveyor :

W. R. SIMPSON, M.A.P.H.I., M.R.S.H., A.M.I.P.H.E.

Asst. Public Health Inspector and Surveyor :

G. J. NAGLE, M.A.P.H.I., M.R.S.H.

COCKERMOUTH URBAN DISTRICT COUNCIL

GENERAL STATISTICS

Area : Acres	2,040
Registrar General's estimate of resident population (mid 1969)								6,410
Number of inhabited houses (end 1969) according to Rate Books								2,317
Rateable Value at 31st December, 1969	£214,730
Sum represented by Penny Rate (1/4/69 — 31/3/70)	£835 5 2

POPULATION

The population figure of 6,410 is given for the year 1969 by the Registrar General and called by him the "Home Population." On this figure the birth and death rates and the incidence of notifiable diseases are based.

The population figure for 1968 was 6,370.

CHIEF OCCUPATIONS OF THE INHABITANTS

Cockermouth is an old market town (its Royal Charter having been granted in the year 1221). For many years Saw-Mills, Building Contractors, a Brewery and the Railway (now closed) have employed a considerable number of persons (mainly male) and between 1939 and 1951 five new works of employment were commenced; one of these, a Blood Manure factory, has ceased; the other four are made up of a Shoe and Slipper factory, a Clothing factory, two light engineering works and a Precast Concrete works, employing altogether 1,200 persons including a large number of female labour, particularly at the two first-named, which also have workers from outside the Urban area. There are as well of course, those individuals absorbed by the usual businesses and trades of a small country town. A few find employment about the large cattle Mart, whilst a few are engaged in agriculture, and in coal mines, quarries and steelworks outside the district.

EXTRACTS FROM VITAL STATISTICS OF THE YEAR

The tables of vital statistics are set out in the following pages.

The crude birth and death rates are corrected by means of an Area Comparability Factor supplied each year by the Registrar General. They allow for varying age and sex distribution of the population in different areas and enable comparisons to be made with figures for other areas.

This year the factor for births is 1.0, for deaths 1.09.

BIRTHS.

Live Births.

Number : 87.

			Males	Females	Total
Legitimate Births	45	40	85
Illegitimate Births	1	1	2
			—	—	—
Total	46	41	87
			—	—	—
Rate per 1,000 population	13.6
Adjusted rate	13.6
Illegitimate Live Births					
(per cent of total live births)	22%

Still Births.

Number : 1.

Rate per 1,000 total live and still-births	11.5
Total live and still-births	88
Infant deaths (deaths under one year)	0
Infant Mortality Rates :				
Total infant deaths per 1,000 live births	0
Legitimate infant deaths per 1,000				
legitimate live births	0
Illegitimate infant deaths per 1,000				
illegitimate live births	0
Neo-natal Mortality Rates (Deaths under four weeks per 1,000 total live births)	0
Early Neo-natal Mortality (deaths under one week per 1,000 total live births)	0
Peri-natal Mortality Rate (still-births and deaths under one week combined per 1,000 live and still-births)	11.4
Maternal Mortality (including abortion) :				
There were no maternal deaths in 1969.				

DEATHS.

			Males	Females	Total
Deaths (all ages)	43	40	83
Death rate per 1,000 population	12.9
Adjusted death rate per 1,000 population	14.1

VITAL STATISTICS

Population of the Urban District is 6,410.

LIVE BIRTHS :—

		Males	Females	Total	Grand Total	Rate per 1000 pop. Uncor.	Rate per 1000 pop. Cor.

GENERAL PROVISION OF HEALTH SERVICES

(a) STAFF

The appointment of Dr. A. Hargreaves as Medical Officer of Health for the area commenced on the 1st September, 1966.

(b) LABORATORY SERVICES

All microbiological work is carried out in the Carlisle Laboratory of the Public Health Laboratory Service. I am most grateful to Dr. D. G. Davies, the Director of the Laboratory, for his help during the year.

(c) LOCAL HEALTH AUTHORITY SERVICES

Medical services provided under Part III of the National Health Services Act, and Welfare Services provided under the National Assistance Act are the responsibility of the Cumberland County Council. Information about these services, including the provision of Home Helps, Immunisation Services, Accommodation for the Physically Handicapped, assistance for the Unmarried Mother, assistance and advice in connection with Family Planning, Accommodation for the Aged, may be obtained from the Area Health Office, Fieldside, Elizabeth Street, Workington.

Home Nursing and Maternity Services are now an integral part of the Family Doctor Service, together with the Health Visiting Service, and enquiries should accordingly be addressed to the Family Practitioners. The local clinic is at Harford House, Cockermouth. The times, places and services are as follows :—

Cockermouth	Child Welfare — Mondays 2-00 p.m.
	School Clinic — By appointment.
	Dental Clinic — By appointment.
	Speech Therapy — By appointment.

The services include specialist advice on the assessment and correction of vision and hearing defects.

A scheme for the screening of women for the prevention of cancer of the neck of the womb is in operation — one session each week at Cockermouth, on Tuesdays at 2-00 p.m. by appointment.

Immunisation procedures are carried out at the Child Welfare Clinics and at schools by arrangement, including B.C.G. vaccination.

(d) NATIONAL ASSISTANCE ACTS

No enforcement action was taken during the year to secure proper care and attention for the elderly and chronic sick.

INFECTIOUS DISEASE

The total number of cases of Infectious Disease notified in 1969 was 13, 9 of which were measles.

There were 4 cases of Tuberculosis notified, and one death from this disease.

IMMUNISATION

SMALLPOX

Age when vaccinated or re-vaccinated	Number Vaccinated	Number Re-vaccinated
Under 1 year	1	—
1 year—23 months	26	—
2 — 4 years	2	—
5 — 14 years	3	1
15 or over	—	—
	—	—
Totals	32	1
	—	—

Statistics relating to smallpox vaccination complications have shown that the safest age at which to perform this process is around two years.

DIPHTHERIA/TETANUS/WHOOPING COUGH

The figures in the table show the number of triple antigen immunisations performed during the year, both primary courses and booster doses.

In all 43 children completed a primary course and 142 had booster doses.

Children over five do not have the whooping cough component.

POLIOMYELITIS

49 children received a primary course of oral vaccine in 1969, and 76 children had booster doses.

MEASLES

51 children received measles vaccination in 1969. This consisted of one dose of living attenuated virus by injection.

B.C.G. TUBERCULOSIS

Mantoux Testing and B.C.G. vaccination was continued in 1969, the age groups concerned being those born in 1956 plus a few older ones not previously tested.

Of 158 children attending schools in Cockermouth who were tested 10 proved to be positive reactors, who had not previously been vaccinated.

CASES ON THE TUBERCULOSIS REGISTER

ANNUAL REPORT
OF THE PUBLIC HEALTH INSPECTOR AND SURVEYOR
W. R. SIMPSON, M.A.P.H.I., M.R.S.H., A.M.I.P.H.E.
For the Year 1969

Mr. Chairman and Gentlemen,

On behalf of W. R. Simpson, who left us at the end of January, 1970, I have pleasure in presenting his fourth and last annual report for the year ending 31st December, 1969.

The year presented a consolidation of work began in 1968 in the field of Food Hygiene and Safety, Health and Welfare of Workers in Shops and Offices and a gradual shift of emphasis to Housing and House Improvement in particular, with the coming into force of the 1969 Housing Act in August.

I wish to record my appreciation of the good work achieved by W. R. Simpson and the help and encouragement received from Dr. A. Hargreaves, the Clerk and his Staff, Mrs. K. Nairn and the Foreman, Cecil Wilson, Esq.

I am,

Your Obedient Servant,

G. J. NAGLE,
Public Health Inspector.

WATER SUPPLY

The following information has been kindly supplied by Mr. C. P. Coates, B.Sc. (Tech.), M.I.C.E., M.I.W.E., Water Engineer to the West Cumberland Water Board, who are responsible for water supplies to the area. I am indebted to Mr. Coates for his assistance in compiling this part of the Report.

Water which is supplied in the area of the Cockermouth Urban District comes from Crummock Water via a 15 inch diameter cast iron trunk main. The water is delivered by gravity into the Moor Reservoir which has a capacity of 300,000 gallons and is situated at an elevation of 265 feet above ordnance datum. From this reservoir a proportion of the water is pumped to the Sunscles Service Reservoir with a capacity of 60,000 gallons at an elevation of 350 feet and which supplies the higher parts of town.

Both service reservoirs are covered.

At present the water is treated at Lorton where lime is added to reduce the acidity of the water and the water is chlorinated to kill any bacteria which may be present. The new Treatment Works near Cornhow Farm, which is about one mile north of Crummock Water, are now in operation. The water is very soft and has an action on iron and steel pipes.

During 1969 the average consumption in the town was 291,000 gallons per day.

Regular bacteriological analysis of the water were carried out, the results being of excellent quality.

The results of samples taken for bacteriological analysis are given below :—

Month	No. of samples taken	Classification	
		Excellent	Unsatisfactory
January	—	—	—
February	—	—	—
March	2	2	—
April	2	1	1
May	1	1	—
June	—	—	—
July	2	2	—

February	1.81
March	1.47
April	3.09
May	2.50
June	2.81
July	1.96
August	2.51
September	4.74
October	2.46
November	7.00
December	4.85
Totals						38.40

SEWERAGE AND SEWAGE DISPOSAL

The sewage disposal works continued to operate and results were achieved which satisfied the requirements of the Ministry of Health for the discharge of sewage effluents into watercourses.

The sewage disposal works continue to be overloaded and it is now known that the settlement tank is no longer operating as such but appears to be operating as a form of septic tank. The overloading of the works by surface water has now rendered the syphons inefficient and the filter beds require renewing.

Occasional flooding of the River Derwent causes the outlet level to rise above the humus tanks and flood the filter beds.

It is obvious that consideration will have to be given to major improvements in the early future.

With the exception of 44 houses and a caravan site which have private sewage disposal facilities, all properties in the district are connected to the public sewers.

REFUSE COLLECTION AND DISPOSAL

There is a weekly collection of both domestic and trade refuse from all parts of the town. The refuse is collected by a kerbside bin collection, but in view of the report of the working party, appointed by the Minister of Housing and Local Government, on refuse collection the kerbside collection must be regarded as a bad system of collection and the Council should once again give serious thought to adoption of some other system as soon as practicable. The paper sack system is recommended, in order to streamline the service, which is ever increasing and make it less onerous to the men employed in the task of emptying the bin.

Refuse disposal is by controlled tipping at the Lorton Road tip and was carried out satisfactorily, although the life of the tip is now on borrowed time.

FACTORIES ACT, 1937 to 1961

There are 54 factories in the area as follows :—

Business	Powered	Non-Powered
Engineering	2	
Shoe Manufacturing	2	
Clothing Manufacturing	1	
Baking	4	3
Joinery	6	
Joinery and Sawmilling	4	
Concrete Products	1	
Printing	2	
Gas Storage	1	
Brewing	1	
Motor Vehicle Repairs	11	1
Agricultural Machinery Repairs	3	
Panel Beating	1	
Slaughterhouses	1	1
Building Sites	4	
Water Filtration	1	
Monumental Masons	1	
Grist Crushing	1	
Egg Grading	1	
Fruit Machine Repairs	1	

The following table shows the position under the Factories Acts, 1937 to 1961, in this district at the end of 1969 :—

Premises	Number on Register	Inspections	Number of Written notices	Occupiers prosecuted
(1)	(2)	(3)	(4)	(5)
(i) Factories in which Sections 1, 2, 3, 4 and 6 are to be enforced by Local Authorities	6	2	0	0
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority	43	1	0	0
(iii) Other Premises in which Section 7 is enforced by the Local Authority (excluding out-workers' premises)	3	0	0	0
Total	52	3	0	0

Number of cases in which defects were found

(c) Not separate for sexes	—	—	—	—	—
Other offences against the Act (not including offences relating to Outwork)	—	—	—	—	—
Total	—	—	—	—	—

(NOTE—Section 1 refers to cleanliness; 2 to overcrowding; 3 to temperature; 4 to ventilation; 6 to drainage of floors; 7 to sanitary conveniences).

PREVENTION OF DAMAGE BY PESTS ACT, 1949

170 visits were made to 50 premises for the treatment of rodent infestation. The techniques of the Ministry of Agriculture, Fisheries and Food were employed and the poison used was Warfarin.

FOOD

Apart from Slaughterhouses, 196 visits were made to various food premises.

Inspection of foodstuffs resulted in the following foods being condemned as unfit for human consumption :—

- 1 Gammon Ham.
- 31lbs. 15ozs. Frozen Vegetables (Assorted)
- 20lbs. 5ozs. Frozen Meat (Assorted).
- 48lbs. 14½ozs. Frozen Fish (Assorted).
- 9lbs. 6ozs. Frozen Cream Cakes.
- 2lbs. 13½ozs. Frozen Fruit Juice.
- 2—12lbs. 4ozs. Tins Cooked Ham.
- 2—12lbs. Tins Cooked Ham.

SERVICES UNDER THE FOOD AND DRUGS ACT, 1955

Milk Supplies — *Brucella Abortus*.

16 samples of raw milk were taken and submitted for bacteriological examination. No positive samples were found.

Ice Cream Samples.

Two samples of ice cream manufactured in the town were taken and submitted for bacteriological examination and were found to be satisfactory.

FOOD HYGIENE (GENERAL) REGULATIONS, 1960

No. of Food Premises	76
No. of premises fitted to comply with Regulation 16 (Provision of wash hand basin)	60
No. of premises to which Regulation 19 applies (Provision of sinks)	68
No. of premises fitted to comply with Regulation 19 (Provision of sinks)	68

SLAUGHTERHOUSES

There is one private licensed slaughterhouse in the area and one public abattoir operated by Mitchell's Auction Co. Ltd. Both slaughterhouses continued to operate satisfactorily. The private slaughterhouse has not been used at all during the year, the owners relying upon the public abattoir in Lorton Street.

The accommodation at the public abattoir in Lorton Street comprises two large off loading bays for the delivery of animals, Lairage, Slaughterhall, Cooling and Hanging Hall, Suspect Holding Bay, Hide and Skin Room, Gut Room, Mess Room, Wash Room with W.C., shower and changing facilities, Office and two separate out loading bays, one for fresh meat and one for hides, skins and waste products.

Although provision has been made for the future installation of a pig dehairing machine and a refrigerated Cold Room, this work has not yet been carried out.

530 visits were made to the Slaughterhouse for meat inspection purposes.
